Using Venn Diagrams Problems - Step-by-Step Lesson

In an office of 40 employees, 17 travel by car, 23 travel by bike, and 10 take both cars and bikes. How many employees in the office are not enrolled in either Car or Bike? * employees are not using either cars or bikes to travel.

Explanation:
We want to find out how many employees come car, bike, and both.
Car = 17 - 10 = 7
Bike = 23 - 10 = 13
Car or bike both = 10

Reservations

Reservations are places in our program that we have reserved for relapse. They may be built around the idea that we can retain a small measure of control, something like, "Okay, I accept that I can't control my using, but I can still sell drugs, can't I?" Or we may think we can remain friends with the people we used with or bought drugs from. We may think that certain parts of the program don't apply to us. We may think there's something we just can't face clean-a serious illness, for instance, or the death of a loved one - and plan to use if it ever happens. We may think that after we've accomplished some goal, made a certain amount of money, or been clean for a certain number of years, then we'll be able to control our using. Reservations are usually tucked away in the back of our minds; we are not fully conscious of them. It is essential that we expose any reservations we may have and cancel them, right here, right now.

- Have I accepted the full measure of my disease?

INTERPRETING OBSERVATIONS

Read the following passage and answer the questions that follow.

The International Conference on Population and Development (ICPD) met in 1994 to discuss ways to slow the growth of the world population before Earth's resources are no longer able to support its population. The goals of the ICPD are to stabilize population growth by helping countries to develop and by helping improve the status of women. By 2015, the ICPD hopes to achieve these goals by providing access to safe and reliable family-planning methods, reducing infant and maternal mortality rates, increasing life expectancy, and achieving universal access to primary education.

8. How does improving the status of women influence the fertility rate?

9. How does decreasing infant mortality rate affect population growth?

10. What are some ways that more access to primary education could be provided in less-developed regions of the world?

If Conversation Cards

What would you do if you had one day left to live?	What would you do if you found \$10 in the street?	If you could have dinner with a famous actor, who would you choose?
If you could change your appearance, what would you alter?	If you could have any job, what would you be?	If you were prime minister, what would you change?
If you could have one special ability, what would you choose?	If you had time, which other language would you learn?	If you could meet one person from history, who would you choose?
If you had to change nationality, what would you become?	If you found a diamond ring in the street, what would you do?	What would you do if you saw someone shoplifting?
If you didn't have to work next week, what would you do?	What would you do if you could speak English perfectly?	Which would you rather give up: your cell phone, refrigerator or television?

W.S.6. Food and digestion.

Exercise 1 - Fill in the missing words in the passage below.

The body needs food for a number of reasons. We need food for growth and to worn out or damaged parts. We also get from food. Energy is used for movement, producing and to keep all of the parts working properly. Before the body can use the food we eat it must pass into the blood. The food is broken down into very small soluble molecules by the system. These molecules then pass through the walls of the and into the blood.

intestines heat repair cells digestive energy

Exercise 2 - Study the diagram below of the human digestive system and then carefully add the labels by choosing from the list at the bottom of this page

tongue salivary gland liver gall bladder small intestine gullet
pancreas stomach large intestine appendix rectum anus
